

Design Engineer

An opportunity to work in a Design Team .

The Tone Group is comprised of three companies, Tone Scaffolding Services Limited, Media Structures Limited and Austen Lewis Limited.

TONE Scaffolding Services is one of the UK's most reputable scaffolding companies. TONE is committed to continuously achieving excellent safety standards, providing the best quality services and products to clients and only employing highly qualified and experienced operatives and staff.

With excellent logistics, an efficient fleet and multiple bases, TONE Scaffolding operates all over the UK. TONE has six scaffolding divisions that are able to work together and / or separately to cater to a vast number of access requirements including Emergency Scaffolds, Security Sensitive Scaffolds, Noise Containment, Temporary Roofs, Demolition, Refurbishments, New Builds and Confined Space. TONE is experienced in providing scaffolding in a variety of locations, Airports, Rail sites, Underground, Industrial sites, Historic and Listed, Commercial and Health buildings are to name but a few.

Media Structures specialises in providing a wide range of event structures, temporary structures and services to the media, TV, film, sports, festival and event industries, and have for over 25 years been involved in many prestigious productions and events. With clients ranging from one-off event organisers to household names our attention to detail and customer service has built a reputation based on quality and trust.

With innovative in-house design capability, huge material resources, expert HSEQ management and masses of experience in a dedicated team are behind the scenes on many successful projects.

We have a requirement for a Design Engineer to join the Tone Group, based in Croydon, as we continue to grow.

The ideal candidate will have:

- Significant UK/ Spanish experience of at least 3 years where they would have worked in the design of temporary works within the relevant sectors;
- BEng/MSc in Civil, Structural or Architectural Engineering; have Graduate membership of IStructE and/or ICE;
- Ability to work in a small design team with strong communication/ relationship skills.
- Guidance on design solutions as required.
- Experience in - Formwork, falsework, propping, façade retention, needling, shoring, edge protection, temporary bridges, site hoarding and signage, site fencing and scaffold design;
- Must have as minimum, good design skills and at more senior level, management skills, along with commercial acumen in the approach to projects and excellent client liaison skills;
- Ideally a strong grasp of design, Autocad 2D – 3D and structural analysis software packages are needed also.

Competitive Salary and Benefits.
